Experienced Software Delivery Manager and a Data Enthusiast, adept at overseeing international teams and implementing innovative solutions. Proven success in managing strategic projects, and leading cross-functional teams. A range of experiences across industries has imparted effective communication and presentation of complex subjects to diverse audiences.

## EXPERIENCE

**Delivery Manager (AI)**                    **FLYR Labs**            (2023)

- Managed international delivery team of data analysts, data scientists and data engineers located in Poland and the U.S.
- Implemented FLYR products, resolving issues throughout ETL process and providing technical assistance to live customers
- Developed plans for hiring, training and mentoring new and existing team members, defining team OKRs
- Gained experience with data analytics tools and technologies – Python, BigQuery, Monte Carlo, Looker and others
- Directed Airflow-based workflow orchestration upgrade in Google Cloud Composer for $100M JetBlue implementation

**Manager, Professional Services Team**            **Kornit Digital, Inc.**        (2021 - 2023)
- Defined scope of work (SOW) of all KornitX projects (SaaS) in North America, problem solving in over 15 projects
- Managed a team of Implementation Managers and Solution Architects across the Americas region
- Supervised development and implementation of strategic projects of KornitX, including:
    - Canva - migrated a network of 15 fulfillers (20+APIs), supporting 20M yearly orders designed in Canva.com and oversaw newly added developments to enhance Canva network requiring refined time management skills
    - Wix - established network of fulfillers for thousands of print-on-demand products for Wix e-commerce platform
- Monitored project progress, resolved issues, and communicated updates to stakeholders
- Demonstrated excellent leadership, communication, and interpersonal skills.

**Senior Project Manager**                    **Amdocs, Inc.**            (2016 - 2021)
- Planned and managed data-driven projects (data pipelines, data visualization, dashboards) for business KPIs
- Led a team of 8 analysts across Mexico, Brazil, Chile, Peru, Argentina, guiding Production Support Groups in SLAs
- Drove implementation of SRE and DevOps across the region, promoting, training, defining KPIs, monitoring ROI
- Promoted innovation and technological solutions for better tracking and reporting of KPIs across the region, resulting in savings of $500,000/year in potential penalties

**Solution Designer**                        **Amdocs, Inc.**            (2013 - 2016)
- Headed requirement sessions as Solution Architect, representing Amdocs Enabler (billing system) in AT&T projects
- Created Enabler system requirements for AT&T business, in a $10M project (Fixed Wireless Internet)
- Reviewed solution design documents throughout project lifecycle, analyzing and providing architectural solutions
- Acted as Product Owner with scrum development teams, keeping requirements, design and sprints results in-sync
- Coordinated integration between Amdocs applications and data lake/data warehouse systems

**Sr. Business Analyst**                        **Ex Libris Group**        (2007 – 2013)
- Designed functional parts of Rosetta, Digital Repository System, for storing and preserving digital content
- Acted as a product owner (scrum, agile) while working closely with the development team
- Acquired proficiency with project management tools (e.g., Jira, Confluence).
- Supervised implementation and conducted training in national libraries in NZ, Germany, Switzerland and Czech Republic

**Senior Application Developer**                    **Amdocs, Inc.**            (1999 – 2007)
- Team Leader of Compound Adverts, responsible for design, development, support and maintenance in Verizon and AT&T Directories upgrade projects to UNIX and Oracle platforms using SQL and C
- Responsible for project management throughout the project life cycle, from planning through implementation
- Led code reviews, unit testing and debugging, analyzing and resolving defects identified through QA process
